I am writing to urge you to reject NAB's petition 04-160. I listen to XM radio daily. I pay for this service and deserve the right to continue to listen to what I pay for. SM radio provides a great service by providing traffic and weather. The traffic report is continuous and lets people know which roads are dangerous. People can avoid those roads with this information. Local radio doesn't do a good job at giving traffic reports. They interrupt that programing with incidental information that is really of no use. I don't feel that the National Association of Broadcasters has any right to limit what I listen to and what XM radio produces. Thank you for your time.
